

# NARA Emergency Response Network

## Environmental Incident Field Checklist

Public quick reference. This document is not a replacement for official emergency directions from authorised agencies.

1. Do not touch oil, chemicals, dead fish, stranded animals, or suspicious materials without PPE.
2. Capture photos/video from a safe distance and note wind, tide, smell, colour, and spread direction.
3. Record GPS/location, time detected, affected length/area, and whether discharge is continuing.
4. Report urgent pollution or hazardous conditions immediately through official emergency channels.
5. Upload supporting evidence through the NARA environmental incident form when connectivity allows.

Immediate danger: call the relevant official emergency service first, then submit online reports when safe.
